

DAIRY PEDIGREE CLASSES

Placement Guidelines

Step 1:

Add the total TPI of the Sire and the CTPI of the Dam for each cow. The cow with the highest total point value places first, the cow with the lowest total point value would place last in the class.

Step 2:

If you have added to TPI and the CTPI and you have a tie between two cows, you would go to the previous generation and add the TPI and CTPI of all four of the Grandsire's and Granddam's.
