

Test

Nervous System

Part One: Matching

Instructions : Match the term with the correct response. Write and the letter of the term by the definition.

A	Motor Neurons	C	Pituitary gland	E	Meninges
B	Cerebellum	D	Brain	F	Impulses

- _____ 1 Coordinates all movement, muscle activity and balance
_____ 2 Major organ of the nervous system
_____ 3 Three layered protective covering of the brain
_____ 4 Electrical signals that travel through nervous system and provide information to the brain
_____ 5 Carry impulses away from the brain and spinal cord to the body
_____ 6 The gland that secretes hormones that are important for reproduction and growth

Part Two: Completion

Instructions: Provide the word or words to complete the following statements.

- 1 Relay system for nerve impulses except smell come from the _____.
- 2 The _____ has four lobes that store information and sends signal for voluntary movement.
- 3 _____ neurons that carry impulses towards the brain and spinal cord.
- 4 Connection between the brain and the spinal cord the _____ contains the medulla oblongata.
- 5 Impulses carried away from the brain and spinal cord to the body are _____ neurons.
- 6 The _____ controls the heart rate, breathing and reflex actions

Part Three: Short Answer

Instructions: Provide information to answer the following question.

- 1 What is the area of the nervous system that helps us respond in an emergency situation?

Test

Nervous System

Part One: Matching

Instructions : Match the term with the correct response. Write and the letter of the term by the definition.

A	Motor Neurons	C	Pituitary gland	E	Meninges
B	Cerebellum	D	Brain	F	Impulses

<u>B</u>	1	Coordinates all movement, muscle activity and balance
<u>D</u>	2	Major organ of the nervous system
<u>E</u>	3	Three layered protective covering of the brain
<u>F</u>	4	Electrical signals that travel through nervous system and provide information to the brain
<u>A</u>	5	Carry impulses away from the brain and spinal cord to the body
<u>C</u>	6	The gland that secretes hormones that are important for reproduction and growth

Part Two: Completion

Instructions: Provide the word or words to complete the following statements.

- 1 Relay system for nerve impulses except smell come from the THALAMUS.
- 2 The CEREBRUM has four lobes that store information and sends signal for voluntary movement.
- 3 SENSORY neurons that carry impulses towards the brain and spinal cord.
- 4 Connection between the brain and the spinal cord the BRAINSTEM contains the medulla oblongata.
- 5 Impulses carried away from the brain and spinal cord to the body are MOTOR neurons.
- 6 The MEDULLA OBLONGATA controls the heart rate, breathing and reflex actions

Part Three: Short Answer

Instructions: Provide information to answer the following question.

- 1 What is the area of the nervous system that helps us respond in an emergency situation?

sympathetic
